🌸 Good evening, Lakshita

Write a beginner-friendly C++ console program that generates random student excuses.

Requirements:

- Ask the user to input a student name
- Store at least 10 creative excuse templates in a vector of strings
- Each template must include a placeholder {name}
- Randomly select one excuse each time the program runs
- Replace {name} with the actual user input before displaying
- Ensure different outputs on different runs using proper randomization (srand and time)
- Handle edge cases like empty input
- Keep the code clean, modular, and well-commented for beginners
- Use only standard C++ libraries

Make the excuses creative, slightly dramatic, and appropriate for a classroom setting.

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS
c:\Users\Dinesh\classwork_c++>cd "c:\Users\Dinesh\classwork_c++\" && g++ excuseGenerator.cpp -o excuseGenerator && "c:\Users\Dinesh\classwork_c++\"excuseGenerator
Student Excuse Generator v1.0
Enter the student's name: Lakshita
Official Excuse for: Lakshita
Lakshita was fully prepared until a neighbour's parrot escaped, flew into the room, recited the entire essay aloud, then refused to let Lakshita write it down.
(Excuse #9 of 12 available excuses)
c:\Users\Dinesh\classwork_c++>cd "c:\Users\Dinesh\classwork_c++\" && g++ excuseGenerator.cpp -o excuseGenerator && "c:\Users\Dinesh\classwork_c++\"excuseGenerator
Student Excuse Generator v1.0
Enter the student's name: lakshita
Official Excuse for: lakshita
A travelling magician knocked on lakshita's door asking for a volunteer. lakshita raised a hand, was levitated over the roof, and didn't land until well after class had ended.
(Excuse #6 of 12 available excuses)
```
